Home Health Billing Examples

Below are some billing examples for revenue codes and CPT codes generally billed by home health agencies. This is an informal reference sheet and is subject to change. As with all providers, it is up to the professional billing staff for the company to determine what is appropriate to bill. As you can see, HHA and HMKR can use the same HCPCS codes but we require that a different Revenue code be used for each discipline. The description next to the revenue code will help describe services rendered.
