

Minnesota HomeCare Association Webinar

Pain Management 101

Presented by:

Angie Oujiri, MAN, RN, Fairview Home Care and Hospice

Tuesday, May 19, 2015

12:00 – 1:00 p.m. CST

Webinar Description: Pain is often a huge hurdle for clinicians to jump as they care for patients and if not controlled, pain has the power to significantly impact a patients' journey. Pain is a multi-faceted, multi-dimension, individual experience for our patients and as we sit across from them at the kitchen table, we need to have plenty of tools in our tool belt. This webinar will explore pain and what it means for our patients, barriers to its treatment, pharmacological and integrative approaches, as well as alternate routes.

Objectives: After attending this webinar, the home health participant will be able to:

- Discuss and assess the 4 domains of pain
- Describe 3 different pharmacological treatment options for pain and 2 integrative interventions
- Define the difference between physical dependence, tolerance, and addiction
- Explore rationale for use of 2 alternate routes for pain medication administration

Speaker Bio:

Angie Oujiri, MAN, RN, is the Clinical Practice Leader at Fairview Home Care and Hospice and manages the Palliative Care at Home program which supports home care patients who need an extra focus on symptom management and end-of-life concerns. In order to train clinicians in palliative care, she developed a 4 hour course designed to offer tools and tips to the home care clinician. Angie is very passionate about the empowerment of nurses, social workers, home health aides, and therapists with regard to palliative care and clinicians must have a solid understanding of the management of symptoms in order to effectively advocate for patients.
